

SMART ALERTING

A smart emergency response device with intelligent voice activation.

Used in conjunction with CareCohort™ Wellness, Smart Alerting provides an added layer of care that ensures elderly residents receive emergency attention even in situations where they are unable to activate available panic buttons.

What is Intelligent Voice Activation™?

Intelligent Voice Activation™ is an always-active technology that recognises preset vocal commands and triggers specified actions. When combined with an elderly care monitoring system or security alarm, it will activate an emergency call to a professional monitoring centre allowing timely assistance to the person in distress.

ALWAYS LISTENING

ALWAYS ANALYSING

RECOGNISES KEY PHRASES

Care Cohort™ Wellness is an enhanced telecare services platform that offers a seamless health monitoring experience for seniors, allowing them to maintain their independent lifestyle for longer.

SMART ALERTING

Innovative alerting solutions

Voice Panic Detector

(VPD) with intelligent voice recognition

Calling for help without picking up the phone

Utilises Essence's unique Intelligent Voice Activation™ (IVA™) technology to recognise calls for assistance and immediately notify the monitoring center.

Allowing elderly residents to receive emergency attention even in situations where they are unable to activate available panic buttons.

- Fully wireless operations – RF communications and battery operated
- Wall and table mounting options
- Water resistance for shower installation
